Dear Parent,

Parenting involves not only catering to the basic need of your ward but it also entails participating in his/her overall development.

Every attempt of yours is towards achieving that goal.

Mathamatical skills form an important aspect of intellectual development. A lot of efforts must have been needed on your part to develop an interest in Maths and simultaneously develop this skill in your child.

Maths is an integral part of life, you must be wishing that your child excels in calculations and solves problems accurately. We would like to extend our help for the same. As we have the complete understanding of the role of mathamatical skills in the development of child. Hence we present to you a host of interesting and enjoyable programmes related to maths.

Your ward can succeed in these skills with the help of your encouragement and our well structured and systematic activities.

With the best regards.
